JUN 19/9

MEMORANDUM FOR: Deputy Director for Operations
 FROM : Don I. Wortman
 Deputy Director for Administration
 SUBJECT : Handwritten Corrections to Headquarters
 Originated Cables and Telepouches

25X1

1. As you will note from the attached survey, handwritten corrections within the text of Headquarters originated messages, both cables and telepouches, continues to decrease. However, handwritten corrections within the originating and dissemination area show no signs of abating. In too many instances, the person(s) coordinating on, or releasing messages, is not the one whose name is typed on the outgoing cable form. Whenever the typed name and the written name differ, that portion of the message will not process through the Optical Character Reader; an operator must manually insert the written name, thus causing a delay in processing. I have requested the Office of Communications to seek solutions to this problem and they will be discussing the matter with representatives of your Directorate in the near future.

25X1

2. Your efforts in reducing textual handwritten corrections is most apparent and deeply appreciated; hopefully these efforts will continue. I also know that we have your support in attempting to reduce, and ultimately eliminate, handwritten corrections in the originating and dissemination area.
